Grow as your business needs with Nex/Bs

Success means different things to different companies. One business may seek more efficient handling of their existing internal operations, while another may be aggressively seeking to expand their business. Regardless of the complexity of these goals, Nexus offers the management tools to help our customers excel and move their businesses forward by combining the cost-effectiveness and ease-of-use solutions with the powerful functionality typically limited to custom-designed applications.

The Tools to Help You Succeed

No one is more aware of what it takes for a business to succeed than those charged with its success, whether it's a small business owner who does everything personally or a manager overseeing one or more elements of a mid-sized to large company. We understand the importance of delivering the most effective solutions today's business professionals need to meet their goals. That's why Nex/Bs Software, strives to ensure that our customers get the insight they need to make the best decisions.

As our customers' businesses grow and their needs change and expand, their software solutions evolve right along with them to continue delivering that vision through smooth migration to the next level of Nex/Bs software solutions. This helps reduce downtime and ensures that your critical business data is securely transferred into your new, more robust system that features the same easy implementation and ease of use as the original.

Small Business Solution

Nex/Bs
Lite

Most small businesses have relatively basic accounting needs. You want a user-friendly solution so you can easily manage your back office functions as you focus on your primary objective –running your business. **Nex/Bs Lite** solution from Nexus offers smooth, streamlined processes while also offering improved vision into your business’s operations and health, allowing you to make better business decisions.

Nexus’s small business product is called Nex-Bs Lite, which includes Following modules and they are integrated each other:

- Financial Accounting
- Sales
- Inventory

Whether you are just transitioning from a manual accounting system or have grown to include more complex tasks, Nexus has a proven solution to help you succeed.

Mid/Large-Sized Business Solution

Nex/Bs
Pro

As your business grows, your operational needs will change and evolve as well. Having a system that smoothly accommodates that growth and eventually transitions to a more robust solution can eliminate much of the difficulty normally associated with expansion. And, knowing your system can grow with you alleviates the uncertainty and complications that accompany growth. Nex/Bs Pro allows you to customize the system according to your needs by adding precisely the elements required without the high costs usually associated with this degree of flexibility.

Nex/BS Pro is a solution that integrates following modules:

- Sales
- Purchase
- Inventory
- Accounts Receivable
- Accounts Payable
- General Ledger
- Human Resources

As your business grows, our solutions give you the peace of mind of knowing that the easy conversion to the next Nexus solution will minimize the disruption normally associated with expansion. And, as with all of our solutions, Nexus Software Customer Support provides the helpful assistance that you need in order to maintain your operational momentum.

Customer Support

Your ability to get the most out of any business management tool is greatly enhanced by the customer support behind the product. At Nexus, we understand the importance of making sure our customers receive the most responsive support possible. From easing the initial transition with set-up assistance to ongoing support to help fine-tune your operations, our primary goal is to help you achieve the results you need to succeed.

Ensuring our customers are equipped to get the most from their Nexus Software solution is yet another way we set ourselves apart. With highly trained support consultants, our customers are assured they'll get responsive support from a knowledgeable source. And, by investing in training and leading-edge technology, Nexus Software ensures that this heritage will continue well into the future..
